

An error occurred while processing the template.

The following has evaluated to null or missing:  
==> qstringmap["ecdma-lc"] [in template "10154#10192#18387089" at line 19, column 15]

Tip: It's the final [] step that caused this error, not those before it.

Tip: If the failing expression is known to legally refer to something that's sometimes null or missing, either specify a default value like myOptionalVar!myDefault, or use <#if myOptionalVar??>when-present<#else>when-missing</#if>. (These only cover the last step of the expression; to cover the whole expression, use parenthesis: (myOptionalVar.foo)!myDefault, (myOptionalVar.foo)??)

FTL stack trace ("~" means nesting-related):

```
The following has evaluated to null or missing:
==> qstringmap["ecdma-lc"] [in template "10154#10192#18372552" at line 12, column 14]
-----
Tip: It's the final [] step that caused this error, not those before it.
-----
Tip: If the failing expression is known to legally refer to something that's sometimes null or missing, either specify a default
value like myOptionalVar!myDefault, or use <#if myOptionalVar??>when-present<#else>when-missing</#if>. (These only cover the last
step of the expression; to cover the whole expression, use parenthesis: (myOptionalVar.foo)!myDefault, (myOptionalVar.foo)??
